AFGHANISTAN
Priority Areas of Return and Reintegration
The Priority Areas of Return and Reintegration are a key component of UNHCR’s work to support the Government of the Islamic Republic of Afghanistan with strengthening essential facilities and services in communities where Afghan refugees are returning to.

The Government of the Afghanistan’s Ministry of Refugees and Repatriation (MoRR) and UNHCR have identified 20 priority areas of return and reintegration where returnees are living side by side with displaced people and local communities. The objective is to strengthen essential services and facilities in the PARRs through an area-based multi-sectoral multi-stakeholder humanitarian-development-peace investment to support durable solutions and create conducive conditions for the sustainable reintegration of returnees by working with diverse actors (government, development actors, private sector, CSOs, CBOs etc.) for Collective Outcomes and in Delivering as One.

The projects fall within the Solutions Strategy for Afghan Refugees (SSAR) and its support platform, a regional initiative, which envisages a future in which displaced Afghans might finally return to their homeland permanently and prosper.

“As a concrete confidence-building effort in support of the peace process, ensure coordinated and targeted area-based humanitarian-development-peace investments in Priority Areas of Return and Reintegration (PARRs), identified by the Government of Afghanistan and UNHCR”

**Humanitarian-Development-Peace (HDP) interventions in PARRs** range from cash assistance and in-kind support; improving access to safe shelter, land, and documentation; improving livelihoods opportunities and self-reliance through value chain investment and entrepreneurial support; developing public and economic infrastructure including schools, health clinics, community centres, roads, irrigation canals, water networks etc.; and promoting the inclusion of returnees in decision-making structures.

PARR HDP interventions contribute to achieving of the 2030 Sustainable Development Goals (SDGs).

**Selection Criteria for PARRs**

- **Areas of origin**
  Locations where forcibly displaced people are originating from

- **Areas of high return and displacement**
  Locations where forcibly displaced people returning to and living in displacement

- **Access**
  Secured environment for presence programmes implementation

- **National priorities**
  Presence and implementation status of National Priority Programme, particularly Citizen’s Charter

- **Cohesion**
  Benefits all people (Whole of Society, Leaving No One Behind) and promotes peace and strengthen social cohesion

- **Sustainability**
  Key elements for reintegration present (land, basic services, proximity to population centres and markets, livelihoods)
Evolution of PARRs: Promoting Sustainable Return and Reintegration

Achievements of PARRs as of August 2020

1,346,907 persons of concern living in PARRs

- Host community: 698,797
- Returnees: 508,388
- IDPs: 139,722

836,667 people assisted

In addition, UNHCR Afghanistan has delivered COVID-19 awareness raising sessions to 1.2 million persons of concern living in PARRs.
The Islamic Republic of Afghanistan’s education system has been devastated by more than four decades of conflict. An estimated 3.7 million children are out of school, of whom 60 per cent are girls, and permanent dropouts may increase due to the socio-economic impact of COVID-19. Insufficient schools and low-quality instruction - with fewer than 50 per cent of teachers having minimum academic qualifications - are key impediments. Many returnee children and youth who have obtained education in the host countries are unable to continue schooling upon return due to the unavailability of schools. The portfolio of projects in the PARRs will increase access to formal education, especially for girls, through the construction of additional schools. This objective was one of the Islamic Government of Afghanistan’s pledges at the Global Refugee Forum.

Insufficient funding, inadequate infrastructure and equipment, ongoing conflict, and recurrent outbreaks of communicable diseases paint a grim reality: one-third of the Afghan population does not have access to basic health services within a two-hour travel radius. Only half of children under the age of 5 have received the recommended vaccinations. The proposed projects would improve access to and quality of health care in the PARRs through construction of health clinics and enhancement of existing health facilities, with a focus on women and rural populations. Since 2019, UNHCR has been supporting midwifery training to enhance community-based reproductive healthcare and provide employment opportunities for women. This work will be further expanded.

Shelter remains one of the most pressing needs of returnees and IDPs in the Islamic Republic of Afghanistan. Through UNHCR’s Cash for Shelter project, vulnerable households receive a cash grant that enables them to build their own shelter and sanitation facilities, with the technical support of UNHCR and partners. This innovative approach aims to ensure safe, dignified and sustainable housing; empower households and communities while reducing their dependency on humanitarian assistance; address protection concerns; and inject investment into the local economy. Additional projects will improve access to clean, sustainable and renewable energy through provision of solar packages and the extension of power networks. All efforts will be made to link these initiatives to the Government of Afghanistan’s Land Allocation Scheme.

UNHCR and partners continue to facilitate voluntary repatriation of registered Afghan refugees through services and support provided at four Encashment Centres located in Jalalabad, Kandahar, Herat and Kabul. Returnees receive a cash grant averaging USD 250 per person to meet immediate needs including transportation. Returnees also receive services including basic health screening, vaccinations for children, mine risk awareness training, referrals to legal assistance to obtain civil documentation, and referrals of persons with specific needs.

Particularly in the context of COVID-19, infrastructure interventions will improve access to potable water, construct WASH facilities, and build irrigation networks and roads.

## Parr Sectors: Key Achievements and Gaps as of 31 August 2020

### Education

**Achievements**
- 24 schools constructed
- 158 RHUs provided to expand classroom space
- 2 playgrounds constructed
- Solar panels for 4 schools
- 140 men and women certified in ICDL (International Computer Driving License)
- 2 women-only internet cafés for young women to increase their skills and knowledge
- 200 returnees/IDPs children received English language trainings

**Gaps**
- Limited space for children in schools (need for the expansion of current school buildings)
- Support returnee/IDP children to obtain civil documentation
- Construction of kindergarten schools and nurseries
- Inadequate WASH facilities in schools

### Health

**Achievements**
- 4 clinics constructed and equipped with solar panels, electricity and lighting
- 12 RHUs to expand clinic space
- 40 women trained in midwifery
- 3 health and hygiene trainings
- One ambulance provided to the main city hospital

**COVID-19 response:**
- 283,300 people benefitted from provision of face masks, hygiene and sanitary kits etc.
- Awareness raising sessions benefitted 1.2 million persons

**Gaps**
- Lack of market-based investment for employment promotion and business development in productive/economic value chains e.g., horticulture, animal husbandry, dried nuts/fruits, honey bee keeping etc.
- Limited technical and vocation training centres

### Livelihoods

**Achievements**
- 1,047 job placements provided for men and women
- 155 market-based small business established
- 331 men and women benefitted from market-based technical and vocational trainings
- 3 women communities linked to global markets through MADE51 programme in carpet/kilim weaving
- 3 partnerships with Chamber of Commerce and Industry (at sub-national level) for apprenticeship and business development
- 2 poultry farms and 2 dairy farms established

**Gaps**
- Inadequate WASH facilities within the communities
- Lack of access to safe drinking water
- Lack of proper communal sanitation facilities

### WASH

**Achievements**
- 23 bore water wells constructed
- 48 solar operated water points and 5 water reservoirs installed
- Implementation of solar-powered pipe scheme projects
- 10 semi-deep wells and 1 water reservoir constructed

**Gaps**
- Inadequate WASH facilities within the communities
- Lack of access to safe drinking water
- Lack of proper communal sanitation facilities

### Shelter

**Achievements**
- 161 permanent shelters (two rooms, a corridor and a latrine) constructed
- 980 households benefitted from cash for shelter programme

**Gaps**
- Lack of access to adequate shelter/housing is a critical need in all the locations
- Lack of private sector engagement investment in the communal housing in PARRs

### Energy

**Achievements**
- One micro-hydro dam project benefitting 250 households
- 203 solar panels installed which improved access to electricity
- 280 street poles with solar lights erected

**Gaps**
- Lack of access to electricity is one of the key constraints.
- Insufficient use of renewable energy for the lack of resources to improve living conditions
# Parr Sectors: Key Achievements and Gaps as of 31 August 2020

## Infrastructure

- 10.2 Km main roads constructed and rehabilitated through cash-for-work
- 2 irrigation canals rehabilitated
- 2 flood protection walls constructed
- 58 culverts constructed/rehabilitated
- 4 small bridges constructed

## Community Development

- 3 multi-purpose community centres constructed
- 2 training centres for women and youth
- 2 sports centres constructed, equipment for 1 local women gym provided, and uniforms for youth playing cricket and football provided
- One minibus provided to facilitate transportation from rural to urban areas and marketplaces
- 2,823 male and 3,849 female youth communities organized and sensitized on rights and obligations
- 32 psycho-social counselling sessions organized

## Special Assistance

- 10,716 vulnerable Persons with Specific Needs (PSN) assisted with Cash for protection, self-reliance, medication and provision of food items. This includes individuals with acute vulnerabilities, female headed households, individuals with disabilities, unaccompanied children, persons displaced in emergencies and members of the host communities
- Lack of unconditional cash assistance to most vulnerable population of the community
- Need for special assistance programmes, particularly livelihood support for vulnerable women to promote self-reliance

---

**Achievements**

- Lack of secondary, tertiary road networks
- Lack of proper drainages and culverts
- Inadequate irrigation canals and channels for increasing agriculture productivity and increasing access to water
- Insufficient flood protection walls

**Gaps**

- Insufficient community centres, especially for women
- Lack of transport facilities to market places
- Inadequate sports facilities

What We Can Achieve Together in PARRs

- **USD 800**: One family receives a solar package and has access to clean energy.
- **USD 1,500**: One person receives vocational training and business start-up assets, improving the well-being of the whole family.
- **USD 3,300**: One family receives cash for shelter and has a place to call home.
- **USD 12,000**: People have access to WASH facilities, improving their health and hygiene.
- **USD 50,000**: An entire community of 3,500 has a new solar-powered potable water scheme.
- **USD 170,000**: Construction of a 6-classroom school = 600 more children go to school per year.
- **USD 300,000**: Construction of a 12-classroom school = 1,200 more children got to school per year.
